Chapter 13

Landscape Ecology Practices in Planning: Landscape Connectivity and Urban Networks

Ebru Enyü

Additional information is available at the end of the chapter

<https://doi.org/10.1007/978-94-007-5829-4>

Abstract

The increasing need to conserve the nature and biodiversity and to maintain human well-being has resulted in the development of landscape ecology and landscape planning approaches in urban environments. In this context, different approaches to planning urban networks have been developed to provide the necessary use and functioning of landscapes, to conserve the nature and species, and to increase the use and enjoyment by people. In this chapter, these approaches have been described and the structure, form, and function of urban networks are discussed. The structure, form, and function of urban networks are discussed in relation to the structure, form, and function of urban networks. The structure, form, and function of urban networks are discussed in relation to the structure, form, and function of urban networks.

Keywords: landscape planning, landscape ecology, landscape connectivity, urban networks, urban networks

1. Introduction

Landscape fragmentation affects habitats and wildlife and causes loss of connectivity (Tilley 2005). The detrimental effects of fragmentation can be reduced or minimized by the creation of new habitats and/or the protection of existing habitats by creating more connected habitat patches for the networks of habitats, green and open spaces. Hence, the growing awareness of the need for connected habitats, green and open spaces was reflected in planning approaches such as greenfields and field-park systems, greenways, ecological networks, green networks and green infrastructure (GZI).

Conservación de los recursos naturales. Los esfuerzos para conservar y proteger la biodiversidad global de manera consciente son un fenómeno reciente. [7] [17] Sin embargo, la conservación de los recursos naturales tiene una historia que se extiende hasta antes de la «era de la conservación».El uso ético de los recursos surgió de la necesidad, por las relaciones directas ... About; Documentation; Books; Tags; Authors; Contest; Log in; Below is a list of books written with bookdown, including those published to bookdown.org (books without substantial content are excluded) and a few hosted on external servers.The books are ordered roughly by date. An asterisk * after a date indicates the date is unknown, which often means a date field is missing ... The Quaternary period (from 2.588 ± 0.005 million years ago to the present) has seen the extinctions of numerous predominantly megafaunal species, which have resulted in a collapse in faunal density and diversity and the extinction of key ecological strata across the globe. The most prominent event in the Late Pleistocene is differentiated from previous Quaternary pulse ... King Wallis Vidor (1894 - November 1, 1982) was an American film director, film producer, and screenwriter whose 67-year film-making career successfully spanned the silent and sound eras.His works are ...
